

# Infinitum Communications Suite

## End-to-end Cloud-native Platform to Empower Communications Industry Transformation

Designed specifically for the communications service providers (CSPs), Infinitum Communications Suite (ICS) is a cloud-native platform with a suite of business and operations support system solutions to help CSPs quickly launch new offerings, transform digital engagement and drive operational excellence.

The solutions suite can support multiple business units of CSPs on a single platform, with rich functionalities to automate and streamline the end-to-end selling, ordering and monetizing processes, orchestrating new digital services through the partner marketplace while taking advantage of new technologies like cloud, IoT, AI and 5G.

Infinitum Communications Suite consists of four key components which underpinned by a data analytics hub. Its modular structure provides high flexibility to empower service providers to address dynamic business needs.

### Digital Experience Suite

Digital Sales Channels

Customer Engagement

### Agent Desktop Suite

Customer Relationship Management

Case Management

## Enabling Agile Integration in Cloud-native Architecture

Infinitem Communications Suite adopts industry best practices of IT architecture designs for seamless integration and extensibility. Taking the cloud-native approach with microservices, and built upon TM Forum's Conformance Certified Open APIs and Information Framework (SID), ICS offers agility and interoperability to ease integration, accelerate time-to-market and deliver better customer-centric services.

With solution architecture that maximizes business and IT agility, Infinitem Communications Suite empowers communications service providers to accelerate the transformation into digital service providers and foster innovative differentiation.

### About Lenovo PCCW Solutions Limited

Lenovo PCCW Solutions is a leading technology solutions powerhouse in Asia Pacific.
